Jeremiah Rogers

Product Owner/Software Developer | https://github.c

EXPERIENCE

SOFTWARE DEVELOPER • FREELANCE • 2020-PRESENT

Full stack web developer with sales and management experience educated at UTSA. Skilled in HTML5, CSS, and Javascript with strengths in teamwork and meeting deadlines while being mindful of costs and revenue associated with projects. Successfully restructured a local business in San Antonio to increase its state and national exposure and expanded its online presence for the owner to streamline the sales process. I am excited to tackle any challenge from different angles and collaborate with others to build applications that solve those challenges. Positioned to provide unique perspectives on how end users interact with software platforms by leveraging a background in project management and business administration.

OBJECTIVE

My career goal is to lead a development team in the financial or digital entertainment sector, by assisting fellow teammates with their code and effectively communicating the needs of stakeholders to the development team, I proudly take ownership and responsibility for any project I am assigned.

OPERATIONS MANAGER • PLATINUM CONVERSIONS • 2020-PRESENT
I am responsible for ensuring employees are on time and conducting their work in a professional manner as well as building customer relationships and occasionally assisting employees with their assigned tasks.

Field Sales Representative • Taurex Drill Bits • 2017-2019
I worked as a sales representative for an oilfield drill bit manufacturer, my duties at this position included building customer relationships and executing sales and deliveries on a 24hr schedule.

EDUCATION

BACHELOR OF BUSINESS ADMINISTRATION • 2019-PRESENT• UTSA
PROFESSIONAL CERTIFICATE IN CODING • 2020 • UTSA

I am continuing my education in the Cybersecurity field so I can utilize that skillset to help business secure their online presence.

MILITARY EXPERIENCE

I served from Oct. 2007-Dec. 2011 as an Infantry Machine Gunner in the Marine Corps. During this time, I deployed on board the USS New Orleans to

many locations across southeast Asia, the Middle East and Africa. My second deployment was to Afghanistan as part of a personal security detail to VIP's including elected officials and celebrities.
